

# AmeriCorps Grants

## Considerations for Potential Applicants

- How many members the organization is interested in? If they just want one member, they may be a better partner organization for an existing grantee than applying for their own grant
- What issue or problem do they want to use members to address? This is an opportunity to determine if the ideas are within the scope of what members can do.
- Encourage the interested parties to review the AmeriCorps website and information contained in the grant competition one-pager

# AmeriCorps Grants

## Considerations for Potential Applicants

- Assist potential applicants with the understanding that AmeriCorps grants allocate a number of member slots and financial funding based on the number of requested slots
- Remind potential applicants that there is a matching requirement but that the match can be in-kind and does not have to be cash- Match requirement for first-year programs is 24%
